INVESTMENT MARKET COMMENTARY

The investment market for UK industrial units shows no sign of pausing for breath into 2022. Q4 2021 delivered a record volume of over £4bn and Q1 is looking to deliver another bumper quarter of transactions. Availability of stock, currently at 1.58% (CBRE) is likely to provide the main limiting factor in transaction volume which is forecast to drive further yield compression in this market sector.

Rental growth is also set to continue the upward trend, especially as supply levels have failed to keep pace with insatiable occupier demand. Significant increases in land values over the last 5 years have placed pressure on new and speculative development schemes coming forward. This is providing opportunities for smaller investors to access this growing market. In fact, the Office for National Statistic has recently produced research identifying that the transport, logistics and storage sector grew at over 88% between 2011 and 2021.

On a macroeconomic level, Bank of England forecast inflation to top 10% this quarter, eroding hard earned savings but offering excellent opportunities to commercial investors looking for inflation and RPI linked property deals.
